**Tom van der Poll**

**Jean-Louis Vincent**

*Sepsis is a life-threatening organ dysfunction caused by a dysregulated host response to infection. Sepsis and septic shock are major healthcare problems, impacting millions of people around the world each year and killing between one in three and one in six of those it affects. Early identification and appropriate management in the initial hours after the development of sepsis improve outcomes.*

*This congress aims to update ALL the healthcare professions involved in sepsis care about all the aspects of its management:*

- *early diagnosis of infection among patients with suspected sepsis acquired in the community*
- *early diagnosis of the etiology of respiratory sepsis acquired in the community*
- *empirical and targeted antibacterial therapy*
- *resuscitation and monitoring (in ICU and outside ICU)*
- *early diagnosis and management of organ dysfunction*
- *source control*
- *resistance and costs*
